

Atip – Avenir Program

Every year, as part of a partnership, Inserm and the French National Center for Scientific Research (CNRS) launch a call for proposals aimed at enabling young researchers to create and lead a team within an established Inserm or CNRS research center. The teams formed will work to strengthen the research of the host unit by independently developing their own research projects. This program aims to promote mobility and attract young, high-caliber team leaders.

ATIP-Avenir : Deadline 18 Novembre

Under a partnership between Inserm and CNRS, a call for proposals is launched aimed at **enabling young scientists to create and lead a team** within an established Inserm or CNRS laboratory in France.

Cet appel d'offres, lancé en partenariat par l'Inserm et le CNRS, vise à **permettre à de jeunes chercheurs de mettre en place et d'animer une équipe** au sein d'une structure de recherche Inserm ou CNRS.
