

Smart Manufacturing and AI for Industry 4.0

The Texas A&M Engineering Experiment Station (TEES), The French Institute of Arts and Trade, and The Office of Science and Technology of the Embassy of France (SST) have come together to organise this event, which will take place in College Station on February 13th, 2020.

The rapid progress of smart manufacturing technologies, specifically data science and AI, is at the heart of the vision of Industry 4.0.

The Office of Science and Technology is happy to invite you to the French American Innovation Day (FAID) on smart manufacturing and AI for Industry 4.0. The Texas A&M Engineering Experiment Station (TEES), The French Institute of Arts and Trade, and The Office of Science and Technology of the Embassy of France (SST) have come together to organise this event, which will take place in College Station on February 13th, 2020.

This 2020 edition will be fixated on subjects such as smart sensors, advanced AI and data science, supplementary and advanced manufacturing, digital twins, AR/VR, cybersecurity, and the advanced informational paradigmes and marketing strategies for the Industries 4.0.

The FAID's, organised since 2001 by the Office for Science and Technology of the French Embassy in the United States, are events that bring together leading experts, researchers, businesses, startups, consultants, and American and French investors to advance questions of science, innovation, and technology.

The FAID program consists of :

- Conferences with scientific experts
- Presentations with French and American startups
- Networking opportunities
