

UCSF, Mount Sinai and the Pasteur Institute unveil their first results in vitro for drug repositioning against COVID19 in Nature

French-American collaboration continues in the fight against COVID19. The international alliance formed by the University of California in San Francisco, the Mount Sinai Hospital in New York and the Institut Pasteur in Paris unveiled today the first results of its in vitro experiments on drug repositioning, a strategy that can lead to a rapid deployment of drugs that already exist against the epidemic.
